TALKS &  
SEMINARS

- Game Theory-based Parameter-Tuning for Path Planning of UAV (virtually at VLSI Design 2021)
- VisSched: An Auction-based Scheduler for Vision Workloads on Heterogeneous Processors (virtually at IBM Research's flagship event Maitreyee 2020)
- VisSched: An Auction-based Scheduler for Vision Workloads on Heterogeneous Processors (virtually at ESWEEK CASES 2020)
- Performance Prediction for Multi-Application Concurrency on GPUs (virtually at ISPASS 2020)
- VisSched: An Auction-based Scheduler for Vision Workloads on Heterogeneous Processors (virtually at DAC 2020)
- Benchmark Characterization and Optimizations for Path Planning of Drones at Innopolis University, Russia (Nov. 2019)
- Architectural Characterization of Vision Workloads at Innopolis University, Russia (Sept. 2019)
- Architectures for Vision and Image Processing Applications at PhD Symposium CSE IIT Delhi (Dec. 2017)
- Architectures for Vision and Image Processing Applications: Survey and Research Proposal at IIT Delhi, India (Jun. 2017)
- Implementation of FPGA based Communication Network using High Speed PCIe and Multi Gigabit Transceivers at National Workshop on Cryptology (NWC), 2014
- Implementation of FPGA based Communication Network using High Speed PCIe and Multi Gigabit Transceivers at BARC Mumbai (Aug. 2014)

HONORS &  
AWARDS

- Winner of the Technical Blog Competition at IBM Research's flagship event Maitreyee 2020  
*IBM Research*
- Invited to attend the Heidelberg Laureate Forum (virtually in Sept. 2020 & physically in Sept. 2021)  
*Heidelberg, Germany*
- Scholarship with short stay: Ph.D. young researcher (Sept.-Nov. 2019)  
*Innopolis University, Russia*

RESEARCH  
SOFTWARE

- Tejas Power Pack** (Aug-Oct 2017)  
*Advisor: Prof. Smruti Ranjan Sarangi, IIT Delhi*
- Power model add-on for Tejas architectural simulator
  - Released under the open source Apache-v2 license [here](#)

SELECTED  
PROJECTS

- Super Resolution Imaging on Reconfigurable Arrays, IIT Delhi** (Jun 2015-May 2016)  
*Advisors: Prof. Kolin Paul and Prof. Anshul Kumar, IIT Delhi*
- Implemented a Convolutional Neural Network on a Virtex-6 FPGA to convert an SD video to an HD video at real time.
  - Optimizations include computation time reduction by exploiting inherent parallelism, efficient matrix multiplication by using Toeplitz representation and memory footprint reduction by using a rotating buffer instead of a full-size input buffer.
  - Designed a self-defined protocol, partially exploiting the OCP protocol, to fetch image data in parallel from four DDR3 banks.
- FPGA Cluster based Parallel Architecture for Cryptanalysis, BARC Mumbai** (May-Nov 2014)  
*Advisor: Mr. Abhishek Bajpai, BARC Mumbai*
- Developed a network of four Virtex-6 FPGAs that communicated via the MGT protocol.
  - Developed Python and C wrappers for PCIe bus drivers to implement DMA from Linux Kernel Memory to FPGA BRAM space
  - Presented paper at National Workshop on Cryptology 2014 (NWC).

---

COURSE  
PROJECTS

- Implemented a distributed ledger of transactions using Google GO, IIT Delhi
- Designed a resource-constrained scheduling algorithm to maximize the performance in a system with multi-port memories, IIT Delhi
- Compared the impact of uniform and non-uniform caches on the performance of the processor, IIT Delhi
- Designed and fabricated a hand-held device to aid in sending flood alerts to the people and rescue location to the rescue team, IIITDM Jabalpur

HOBBIES

Yoga, Meditation, Badminton
